1. The amendment and arguments filed on 10/17/05 have been considered.

The Drawings filed on 02/22/02 are accepted.

Prior art of record, Munch, "Versioning in a Software Engineering Database – the Change Oriented Way", 1993, remains the closest art in searching.

Reasons for Allowance

2. Claims 28-30, 33, 36, 39-45, 47, 49-53, 55-57 are allowed.

Prior of record, Munch's reference, discusses various subjects in versioning, and the discussion discloses including modifying the version of an ancestor (or a first set of objects) into a new common version by merging the ancestor with revisions, or variants, functions.

However, with regards to the independent Claims 28, 52, and 56-57, these Claims are amended, and included with "collecting object definitions from an ancestor repository", "first set of modified objects", and "second set of modified objects". The reference of record, Munch, does not explicitly disclose all features in the combination as claimed in these Claims; particularly, Munch does not explicitly disclose identifying "a second set of modified objects" in the second modified version by comparing against attributes of corresponding objects in the common ancestor version based on the object definitions.

Therefore, the following is an examiner's statement of reasons for allowance: The cited prior arts taken alone or in combination fail to teach claimed invention comprising at least features as discussed above as in the independent Claims 28, 52, and 56-57.
